Summary

AI and Data Science graduate with hands-on experience developing responsive web applications and modern frontend systems using React.js, JavaScript, HTML, and CSS. Skilled in building modular and scalable UI architectures, integrating RESTful APIs, and optimizing frontend performance for data-driven applications. Familiar with TypeScript and Angular fundamentals, with experience working in Git-based development workflows. Passionate about building scalable, user-centric web applications while improving performance and usability.

Skills

Programming Languages: JavaScript, TypeScript, Python

Frameworks and Libraries: React.js, Angular, Node.js, Express.js, Tailwind CSS, Redux Toolkit

Databases, Tools and Technologies: MongoDB, MySQL, RESTful APIs, Axios, JWT Authentication, Git, GitHub, Postman, Linux, Jest, React Testing Library

Projects

DevConnect | *React.js, Node.js, Express.js, MongoDB*

August 2025 – October 2025

- Architected a full-stack developer collaboration platform enabling real-time networking, project collaboration, and secure user interactions.
- Developed a high-performance React frontend using Vite, Tailwind CSS, and Redux Toolkit, implementing reusable component architecture, normalized global state, and responsive layouts.
- Integrated RESTful APIs with JWT authentication and implemented WebSocket-based real-time communication for collaboration and messaging features.

StreamHub | *React.js, Redux Toolkit, React Router, Tailwind CSS*

January 2025 – March 2025

- Built a scalable video streaming web application integrating the YouTube Data API to fetch and render real-time video content.
- Improved application performance by implementing debounced search and Redux-based caching, reducing redundant API requests.
- Enhanced user experience using lazy loading, dynamic routing, recursive nested comments, and simulated live chat functionality.

Experience

The Brand Hypothesis

September 2025 – November 2025

Frontend Developer Intern

Chennai, Tamil Nadu

- Developed responsive, cross-browser compatible web interfaces using React.js, HTML, CSS, and JavaScript, delivering scalable UI components across desktop and mobile devices.
- Integrated RESTful APIs to build dynamic, data-driven frontend features, enabling efficient client-server communication and seamless data rendering.
- Designed modular React component architecture with reusable UI patterns and optimized rendering strategies, improving maintainability, development efficiency, and frontend performance.

Education

Bachelor of Technology in Artificial Intelligence and Data Science

2021 – 2025

KCG College of Technology, Chennai, Tamil Nadu

CGPA: 7.4 / 10

Higher Secondary Education (CBSE) — Computer Science & Mathematics

2020 – 2021

Kendriya Vidyalaya, Minambakkam, Chennai

Percentage: 94%

Secondary Education (CBSE)

2018 – 2019

Kendriya Vidyalaya, Minambakkam, Chennai

Percentage: 82.8%

Certifications

- Namaste React (NamasteDev)
- The Web Developer Bootcamp 2025 (Udemy)
- Namaste Data Structures and Algorithms (NamasteDev)
- Namaste Node.js (NamasteDev)
