 +91-7305467190  saikalyan.srk@gmail.com  LinkedIn  GitHub  Portfolio

Summary

Full-Stack Developer with experience in building and optimizing software systems using React.js, Node.js, Express.js, and MongoDB. Skilled in designing RESTful APIs, building secure backend services, and optimizing frontend performance, with hands-on experience applying AI, Machine Learning, and LLMs to build intelligent, data-driven applications. Passionate about developing secure, efficient, and scalable solutions. Seeking a responsible and challenging position to support my career goals.

Skills

Languages: JavaScript, TypeScript, HTML, CSS, Python, SQL
Frameworks, Libraries and Tools: React.js, Redux Toolkit, Tailwind CSS, Vite, Node.js, Express.js, FastAPI, Flask, Socket.io, Postman, Jest, React Testing Library
Databases: MongoDB, MySQL, PostgreSQL
DevOps & Deployment: Git, GitHub, Docker, AWS (EC2, S3), CI/CD, MLflow

Projects

- DevConnect** | *React.js, Node.js, Express.js, MongoDB*
- Architected and developed a full-stack developer collaboration platform using React.js, Node.js, Express.js, and MongoDB, enabling real-time networking, collaborative project building, and team communication.
 - Built a modular and responsive frontend using React.js with Vite, Tailwind CSS, and Redux Toolkit, implementing reusable component architecture and efficient global state management, while minimizing redundant API calls for seamless navigation.
 - Developed secure backend services with Node.js and Express.js, designing RESTful APIs with JWT authentication and implementing WebSocket-based real-time communication for live project updates and messaging.
 - Implemented lazy loading for images and components and optimized assets by converting them to WebP format, resulting in a smoother, faster-loading interface across devices.
- StockRadar** | *Python, React.js, Flask, PostgreSQL*
- Built an autonomous NSE/BSE paper-trading assistant with dual-provider LLM orchestration (Claude-first, GPT-4 fallback), real-time news sentiment, and earnings-signal ingestion for 7-day forecasting.
 - Implemented an XGBoost/LightGBM ensemble on technical indicators and regime signals, with pre-trade safety rails and an agentic tool-use loop.
 - Developed an LLM-powered chatbot for stock conversations, investment support queries, and portfolio suggestions.

Experience

- | X Factor | Dec 2025 - Present |
|--|---------------------|
| Associate Web Developer | Chennai, Tamil Nadu |
| <ul style="list-style-type: none">Developed a custom content management system using React.js, Node.js, Express.js, and MongoDB, significantly reducing dependency on manual code changes for routine content updates.Built and maintained full-stack features using React and Redux Toolkit on the frontend, alongside Node.js, Express.js, and MongoDB on the backend.Optimized frontend performance using Vite, code-splitting, and image optimization techniques to reduce load times and improve responsiveness.Collaborated closely with the team to design responsive, cross-device layouts, ensuring a consistent and polished user experience across desktop and mobile platforms. | |

Education

- | | |
|--|-----------------|
| Bachelor of Technology in Artificial Intelligence and Data Science | 2021 - 2025 |
| KCG College of Technology, Chennai, Tamil Nadu | CGPA: 7.4 / 10 |
| Higher Secondary Education (CBSE) - Computer Science & Mathematics | 2020 - 2021 |
| Kendriya Vidyalaya, Minambakkam, Chennai | Percentage: 94% |
